This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. REPORT.

To the Honorable the Legislature of the State of New York:

The trustees of the state library respectfully present this their fifty-seventh annual report:

At the close of the year 1873 the number of volumes in the library was		90, 887
Of which there were in the general library	66, 253	
In the law library	24, 634	
At the close of the year 1874, the number was		93, 809
In the general library	67, 935	
In the law library	25, 874	
The additions in the year 1874 were:		
To the general library	1, 682	
To the law library	1, 240	
Total additions in 1874		2, 922
Of these were acquired by purchase	1, 357	
By donation and exchange	1, 565	

The number of books added to the library during the year is greater than that of any of the three years preceding, but the proportion obtained by purchase does not reach the average number of those years. This is accounted for by the fact that so large a part of the purchases were for the law library, the prices of law treatises and reports being larger than of works on general literature and science which are purchased for the general library; and by the additional fact that fewer opportunities than usual occurred during the year to make purchases at any considerable discount.

The most noteworthy addition by donation to the library, has been from the Rev. Wm. B. Sprague, D. D., of about eight thousand pamphlets and periodicals. Dr. Sprague has previously given largely

of the pamphlets, of which he had during many years been an assiduous collector, to literary institutions, and all that remained he has generously and kindly bestowed on the state library in this city, in which he had passed forty years of his life. In one of the letters containing the offer of his pamphlets to the state, he remarks: "I have been casting about for some institution where they may be deposited with the best prospect of being useful. My attachment to Albany, I believe, has led me to think of the state library."

The periodicals in this collection have contributed largely toward perfecting sets. Many of the pamphlets are on subjects of American history and biography, and are valuable for their rarity or antiquity. The twenty eulogies of Washington which Dr. Sprague has presented have been bound with others in a collection of three volumes, and make the whole number in the library one hundred.

Such of these pamphlets as duplicate what we already had, will bring valuable returns in exchange.

Four or five hundred have been received from the collection of the late Rev. Dr. H. N. Pohlman, the gift of one of his daughters. In this are twenty eulogies on President Lincoln. These eulogies now in the library are about one hundred.

Valuable contributions of pamphlets have also been made by Governor Dix and Vice-Chancellor Benedict.

The number of volumes added to the law library exceeds the average of several preceding years.

The special appropriation of fifteen hundred dollars, made by the last legislature for the department, has enabled the trustees to supply some deficiencies, and measures are in progress for supplying others.

Valuable additions have been made of American and foreign law periodicals, law reports and American statute law.

The series of publications from the office of the commission of patents of Great Britain, in bound volumes, and arranged in card boxes, amounts to about twenty-five hundred volumes, the largest work in one series that exists. It is a gift of the British government, one of the conditions of which is, that special care be used for its proper preservation.

To provide the necessary cases for the annual additions of the present and the coming year, the trustees find it necessary to ask for an appropriation of two hundred dollars.

The crowded state of the library makes necessary some additional provision for shelving and for the safety of the books, at a cost of about two hundred and fifty dollars.

The growth and management of the library during the past year are satisfactory to the trustees; and they confidently look to the legislature for liberal provision for its continued increase.

All of which is respectfully submitted.

By order of the trustees,

JOHN V. L. PRUYN,
Chancellor of the University.

S. B. WOOLWORTH,
Secretary.
